Fuqia e lëvizjes translative

$$P = \frac{A}{t}$$

$P \rightarrow$ fuqia

$A \rightarrow$ puna mekanike, $t \rightarrow$ koha.

$$\langle P \rangle = \frac{\Delta A}{\Delta t}, \quad \Delta t \rightarrow 0$$

$$\lim_{\Delta t \rightarrow 0} \langle P \rangle = \lim_{\Delta t \rightarrow 0} \frac{\Delta A}{\Delta t} \quad \text{ose} \quad P = \frac{dA}{dt} / dt$$

$$dA = P \cdot dt / \int \quad \int dA = P \int_0^t dt$$

$$A = P \int_0^t dt, \quad P = \text{konst}$$

$$A = Pt \quad \text{ose} \quad P = \frac{A}{t} = \frac{F \cdot s}{t} = Fv$$

$$P = F \cdot v$$

$$P = \frac{A}{t} = \frac{1J}{1s} = 1W$$
