

# Ligjerata 7d

## Ligjet e Keplerit

### Ligji i I i Keplerit

### Ligji i II i Keplerit

### Ligji i III i Keplerit

$$\frac{T^2}{r^3} = \frac{4\pi^2}{\gamma M} = \text{konst.}$$

$$F_g = F_{cp}$$

$$\gamma \frac{M}{r^2} = \frac{v^2}{r}$$

$$v^2 = \frac{\gamma M}{r}$$

$$v = \omega r = \frac{2\pi}{T} \cdot r$$

$$\frac{\gamma M}{r} = \frac{4\pi^2}{T^2} \cdot r \Rightarrow \frac{T^2}{r^3} = \frac{4\pi^2}{\gamma M} = \text{konst}$$
